

Scar Treatment & Therapy

Affordable, doctor recommended, non-surgical option to improving the appearance of your scars for all skin types and color.

An affordable doctor recommended, non-surgical option to improving the appearance of your scars for all skin types and color. Ideal results when used with Scar Esthetique® Creme.

Now there is an affordable, doctor recommended, non-surgical option to improving the appearance of your scars for all skin types and color. Doctors around the world have used Silicone Elastomers to treat Hypertrophic and Keloid scars, scars caused from burns as well as surgical scars. The medical literature reflects over 50 articles on the treatment of scars up to 16 years old using this technology.

Scar Fx® Silicone Scar Therapy is a medical product that can help improve the appearance your new scars as well as being effective on older scars. Scar Fx® is effective on your most severe scars which include Hypertrophic and Keloid scars. Also, it works well on scars caused by burns or surgical scars regardless of the age of the scar. Scar Fx® Scar Therapy is a non-surgical, low cost approach to making your scar tissue soft and smooth.

While Scar Fx® Scar Therapy neutralizes the scar's color, it works to flatten raised scars. It is easy to use and has no reported side effects. Scar Fx® Scar Therapy is a soft, pliable, silicone formulated sheet that contours easily to any part of your body. It is applied daily over your scar. Scar Fx® Silicone Scar Therapy is the most inexpensive way to manage your scar.

- Optimal results when used with [Scar Esthetique® Scar Crème](#)

One piece of Scar Fx® Silicone Therapy should last for the duration of your treatment.

Scar Esthetique®

Advanced Scar Therapy

Studies have shown that applying a topical crème as an adjunct to silicone sheeting (Scar Fx®) further improved the appearance of scars. Our Scar Esthetique® scar cream has taken the most effective ingredients from all of the scar topical crèmes in the marketplace today and combined into one easy to apply product.

Scar Esthetique® is a crème with 23 active ingredients including 10 anti-oxidants, 2 polypeptides, liquid silicone and natural botanicals to improve scar cosmesis. Recommended treatment is Scar Fx® during the night and Scar Esthetique® during the day. Each product may be used alone as well.

Scar Esthetique® is the only product in the market to add all three types of scar treatment into one product. Please review our ingredients and your decision will be an easy one your scar care. Doctors recommend using our Scar Fx® medical grade silicone sheeting in conjunction with Scar Esthetique® for the most effective scar treatment care.

Retinyl Palmitate (Vitamin A) is probably the most important vitamin for the appearance of the skin. Vitamin A is essential for normal growth, regulation of metabolism, cell structure and healthy skin.

Coenzyme Q-10 has been the subject of important research for the past 30 years. This nutrient plays a role in the body's production of adenosine triphosphate, the basic energy component of the cell. Onion extract acts as an anti-inflammatory and seems to inhibit the over production of collagen in a scar.

Onion Extract acts as an anti-inflammatory and seems to inhibit the over production of collagen in a scar.

Pinus Pinaster Bark Extract (Pycnogenol) is a unique and powerful natural plant extract made from the bark of the European coastal pine, pinus maritima. Pycnogenol possesses antioxidant properties that help protect against free-radicals. It enhances the ability of collagen to repair itself, thereby protecting against age-related and degenerative processes. Pycnogenol also Inhibits swelling (edema) and inflammation. Improves skin health by reducing damage, increasing nutrient supply and improving elasticity.

Glucosamine is believed to help people rebuild damaged joints, tendons, cartilage and soft tissue.

Vitamin C also known as Ascorbic acid. Vitamin C is an important antioxidant that helps neutralize harmful free-radicals in cells. It also plays a key role in the body including the formation of collagen, hormones amino acid metabolism and iron absorption.

Arnica herb helps increase circulation and reduces swelling and bruising.

Lecithin is an important natural source of Choline, Inositol and Linoleic Acid. Choline and Inositol are vital components of all cell walls and play important roles in cell growth and function.

Grape Seed Extract Powerful anti-oxidant.

Green Tea Extract Stimulates important anti-oxidants and neutralizes free radicles at the cellular level.

Allantoin Keratolytic effect of skin softening and rapid cell regenerator.

Bisabolol Essential oil of chamomilla recutita and acts as an anti-inflammatory.

Scar Esthetique® is Effective on Surgical Scars, Traumatic Scars, Old Scars and Burns.

Directions Apply Scar Esthetique® 3-4 times daily over your scar. Results can take as little as 72 hours up to 3 months. Older scars may take longer.
